

Chemo Calendar Requirement

Overview:-

Chemo Calendar is a custom Calendar for the Cancer patient. This custom calendar contains complex drugs schedule and frequency. This is manually maintained by nurses and doctors and on the daily basic needs to change schedule based on the patient's availability.

That's I want to make a complete automated user and patient it's specific UI platform

Scope: - Need to develop a custom calendar which can fit the patient and hospital needs. In this calendar patient or hospital, change/delete and alter the custom schedule. In other words, need to develop an application which has the entire patient schedule available. Provide/Doctor can Delete/Change/Move based on the patient need. In this application we want to bidirectional communication between the patient and the provider.

AI Agent Standing Instruction : -

1. Use Haiku 4.5 All the Time.
2. First of all – Give me the entire application Plan.
3. You are the Full Stack Application Developer and Build the world class UI/UX Interactive application that consists of FrontEnd/Backend and other application programmatically file Python etc.
4. Claude will automatically start a dev server and **a preview panel appears in your chat** showing the live output. You can see your app render in real-time as Claude builds it.
5. Based on the Document – Created a Prompts clearly for each session separately. So I will understand each Step-by-Step progress and implementation. I need clear prompts of each session because I can use these Prompts for other application if required for similar application.
6. Provide me the Supabase database free tier – installation and step by direction
7. Layer Technology
 - a. FrontendReact (Claude generates this)
 - b. BackendNode.js/Express (Claude generates code)
 - c. Database **Supabase** (you provision)
 - d. Hosting – Docker configuration file and setup file – Step by Step.
8. As you are a Full Stack Application Developer – If you find any discrepancy in the workflow design. Please let me know – once I approved we will implement in the code.

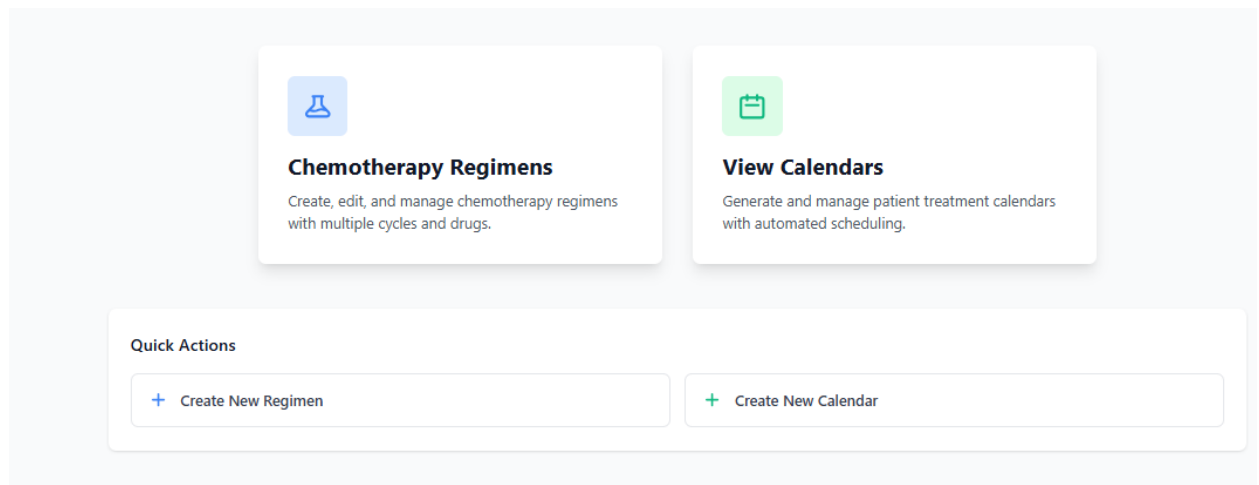

In this there are multiple components like me pointed out in the detail requirement to understand the system. *** Consist for Web + Mobile Application.

0. Dashboard PAGE
1. Login Page Requirement and Details Be
2. Regime creating Design and required Field for Frontend UI and Backend Table
3. Creating New Calendar
4. Drugs Requirement
5. Provider Tab
6. Patient Tab
7. Mobile Application for the Chemo Treatment
8. Deployment Config Fix

0. In the Dashboard Page it consists of following. This is scratch design and as you are full Stack Developer. Come back to most profession and suitable design.

1. Summary Session on top – No of Today Appointment/No of this week appointments/Total Patients
2. Patient Treatment schedule – Today/Tomorrow and Next Day onward
 - a. Patient Name –Provider Name Regimens Name (When Click Regimens Name – open the Patient Treatment Calendar)
3. Drugs Approval Screen
 - a. New Drugs Add Request – Need Approval from – Admin/Organizer
4. Patient Reschedule Request –
 - a. Required to adjust the Patient Treatment Calendar
 - b. Confirm that will Notify Patient on his Mobile Application
5. Like Below
 - a. Access the existing Chemotherapy Regimens

- b. View the Existing Calendar
- c. Creating New Regimen
- d. Create New calendar

6. If you think any additional field required in the Dashboard Introduce from AI Side.

3. Add Disclaimer When the User Login back to the Application Existing User Login Page – Reference Below

⚠ Important Disclaimer

For Educational and Planning Purposes Only: This application is designed as a guide for chemotherapy treatment planning and should not be used as the sole basis for clinical decision-making.

Patient Privacy: Do NOT use real patient identifiers (names, medical record numbers, dates of birth) in this system. Use only initials or anonymized identifiers to maintain HIPAA compliance and patient privacy.

No Warranty: This software is provided "as is" without any warranty of any kind. The creators and maintainers make no guarantees regarding the accuracy, completeness, or reliability of the information. Use at your own risk.

Verify All Information: Always verify drug doses, treatment schedules, and protocols with official prescribing information and institutional guidelines before administration.

4. My Profile

a. Profile Information

Profile Information	Change Password	Settings	Feedback
---------------------	-----------------	----------	----------

Profile Information

Update your personal details. Your username cannot be changed.

First Name	Last Name
Hospital	Organizer

Email Address

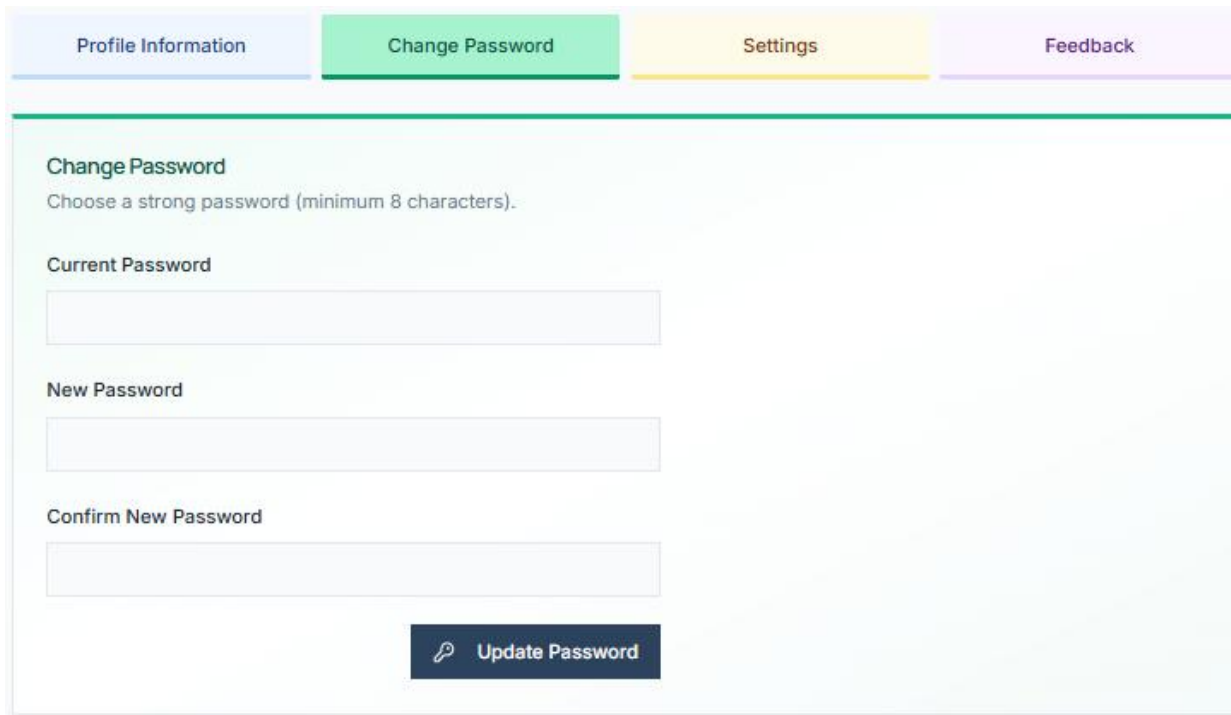

Organization

Username

Username cannot be changed.

 **Save Changes**

b. Change Password

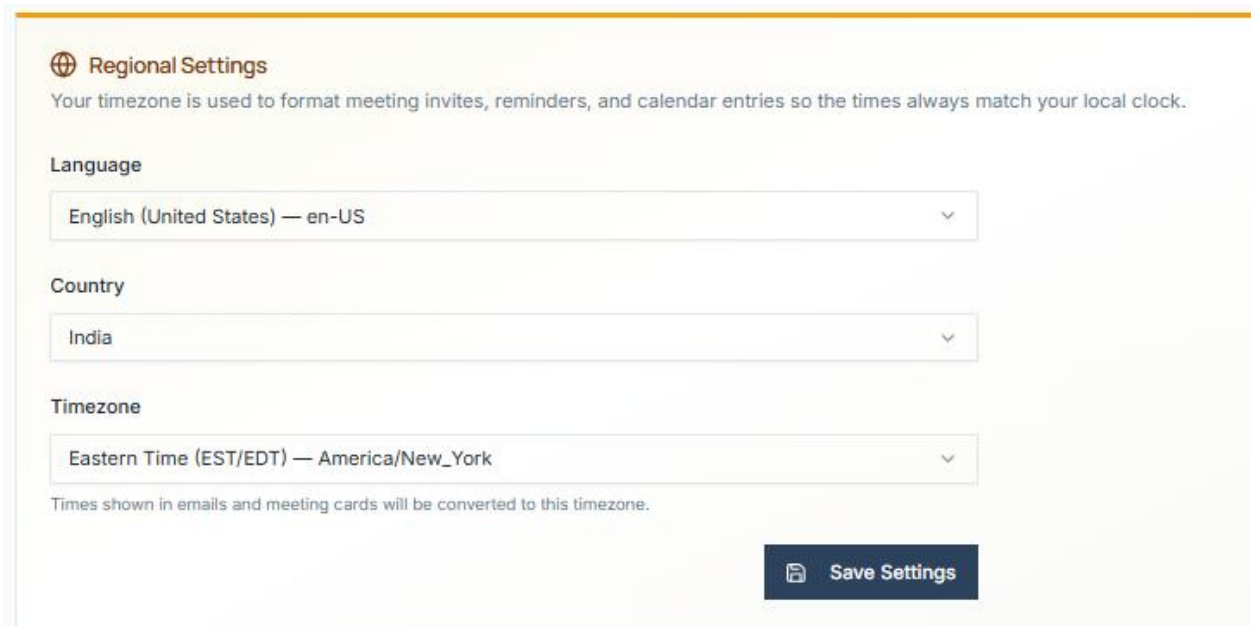

The 'Change Password' form is part of a user profile management interface. It features a horizontal navigation bar with four tabs: 'Profile Information' (blue), 'Change Password' (green, active), 'Settings' (yellow), and 'Feedback' (purple). Below the tabs, the form is titled 'Change Password' and includes a sub-instruction: 'Choose a strong password (minimum 8 characters)'. There are three input fields: 'Current Password', 'New Password', and 'Confirm New Password'. At the bottom right, there is a dark blue button with a key icon and the text 'Update Password'.

c. Settings

i. Regional Settings

1. Language (EN-US for Now)
2. Country – All Country – USA
3. Time zone – User Should Setting the Time Zone.

The 'Regional Settings' form is titled with a globe icon and the text 'Regional Settings'. It includes a descriptive sentence: 'Your timezone is used to format meeting invites, reminders, and calendar entries so the times always match your local clock.' Below this, there are three dropdown menus: 'Language' (set to 'English (United States) — en-US'), 'Country' (set to 'India'), and 'Timezone' (set to 'Eastern Time (EST/EDT) — America/New_York'). A note at the bottom states: 'Times shown in emails and meeting cards will be converted to this timezone.' A dark blue button with a save icon and the text 'Save Settings' is located at the bottom right.

Note :- Email received by the Owner of the Application.

e. Theme

Here's a full app where **all 12 palettes work as live themes** — click the theme button in the top-right to switch. Here's everything that changes instantly:

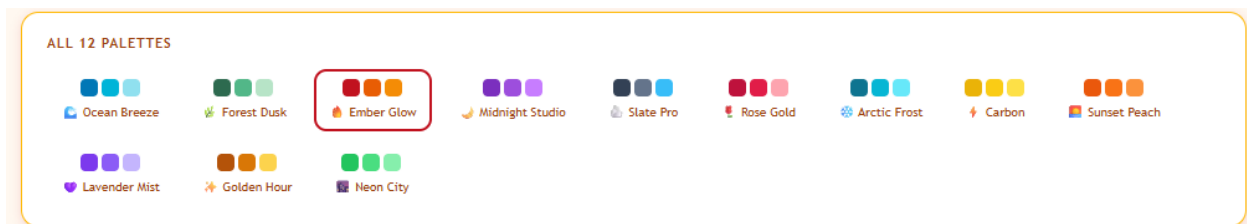

What updates with each theme:

- i.  **Background & surface colors** — the entire page, cards, and sidebars
- ii.  **Font family** — each palette has its own unique font (Georgia, Palatino, Courier, Gill Sans, etc.)
- iii.  **Navigation bar** — color, text, and active button style
- iv.  **Cards, stats, tags, progress bars** — all pick up the palette's primary/secondary/accent
- v.  **Buttons** — solid and outline variants both adapt
- vi.  **Avatars** — gradient matches the palette
- vii.  **Color strip at the bottom** shows the active palette tokens liv

The 12 themes:

Name	Vibe
	Ocean Breeze Cool blues, serif
	Forest Dusk Earthy greens, elegant
	Ember Glow Warm reds/oranges
	Midnight StudioDark purple, monospace
	Slate Pro Clean neutral, professional
	Rose Gold Rich pinks, refined
	Arctic FrostIcy whites & cyan, clean sans-serif
	CarbonPure black bg, neon yellow accent, monospace
	Sunset PeachWarm orange-pink, elegant Optima font
	Lavender MistSoft purples & lilac, Garamond serif
	Golden HourRich amber & gold, classic Baskerville
	Neon CityDark bg, electric green, techy monospace

This option should also show in the bottom if the Page

2.2 Regime - Creating Single Cycle or Multiple Cycle.

1.1 In any Cycle Below are fields minimum required and I add any number of Drugs in any cycle.

1. Drugs Name
2. Dose
3. Days (1,4,8,11) or (1-21) or (1-4, 9-12)
4. Route
5. Location/Department

*** This below part with Matching Mobile Application

- a. Department Name
- b. Office Address
- c. Office Location Hint (Example – Go to the Foss Clinic and Take Elevator F Floor 6)
6. Infusion Duration (min) - (optional)
7. Observation Time (min) (optional)
8. Dose Cap (optional)
9. Warnings

1.2 All the Cycle Attributes are editable

1.3 Each or any cycle is completely editable

Special Note – About the Days Calculation details

1. Days input (1,4,8,11) – When the Medication Start “1” day one/”4” Means 4th Day/8th Means 8th day so on.
2. Days input(1-21) – Continuous 21 days
3. Days Input (1-4, 9-12) - First date to 4th day and then ninth day to 12th day from the beginning of the present calendar

Cycle Field Snapshot

Edit Cycle 1

Cycle Number	Cycle Length (days)
1	21

3. Creating New Calendar

Step – 3.1 Add Patient Information

Basic Information

First Name *	Last Name *
MRN (Medical Record Number)	Gender
e.g., P-12345	Select gender
Date of Birth	Phone
mm/dd/yyyy	+1 234 567 8900

Must be a valid date in the past

Email

Address

Step - 3.2 Search option and Select the All Regime in the Drop-Down Menu or Scroll Bar .

3.2.1 – Show All Regime.

3.2.2 Should have an option to check box option to view

3.2.2.1 Standard/Owned/Share

3.2.2.2 Indication different Color Pattern

3.2.2.3 When I select Regime. I should have Preview option to review the selected regime

3.2.3 – Snapshot for Reference. This image mimics the functionality.

Select Regimen

Search regimens by name or disease type...

Show: ☒ Standard ☒ Owned ☒ Shared

All Regimens Preview

- MATRIX (Copy) - CNS Lymphoma [Owned]
- Daratumumab Lenalidomide Bortezomib Dexamethasone -CEPHEUS - Myeloma [Owned]
- MATRIX - CNS Lymphoma [Standard]
- Daratumumab Lenalidomide Bortezomib Dexamethasone -CEPHEUS - Myeloma [Standard]
- AALL1731 Non-DS SR B-ALL Patients - Induction - ALL [Standard]
- Daratumumab, Bortezomib, Lenalidomide, and Dexamethasone-PERSEUS - Myeloma [Standard]
- MEC (MitoXANTRONE/Etoposide/High-Dose Cytarabine) - AML [Standard]
- ECOG 1910 - ALL [Standard]

MATRIX (Copy) - CNS Lymphoma | Ferreri AJ, et al. Lancet Haematol. 2016;3(5):e217-27.a | 1 cycle | [OWNED]

Step - 3.3 – Pick the Start Date when the Regimen Start. Based on that Regimen Calendar created. **Note:** The calendar will automatically generate events based on the selected regimen and start date.

3.2.4 – Snapshot for Reference -

Start Date

mm/dd/yyyy

Step – 3.4 – Cycle Selection – Single and Multiple Cycle Option

3.4.1 Generate Entire Regimen

3.4.2 Select Specific Cycle

3.4.3 Cycle Selection Snapshot for reference

3.4.4 At the end show me the same dialogue - **Note:** The calendar will automatically generate events based on the selected regimen and start date.

Cycle Selection

☐ **Generate Entire Regimen**
Create calendar events for all cycles in sequence

☒ **Select Specific Cycles**
Choose which cycles to include in the calendar

Select the cycles you want to include:

☐ Cycle 1 - 1 (21 days)☐ Cycle 2 - 2 (21 days)☐ Cycle 3 - 3-8 (21 days)☐ Cycle 9 - 9+ (28 days)

Cancel

Create Calendar

Note: The calendar will automatically generate events based on the selected regimen and start date.

Step 3.5 – After creating the new Chemo Calendar Page is look like this

[illegible]

3.5.1. - (Header Portion) - Header Part of the Patient Specific Chemo Calendar

3.5.1.1 - Attributed

1. Patient Name
2. Medical Record Number (MRN)
3. Patient Email
4. Patient Phone
5. Regimen Name
6. Start Date
7. Provider Name

3.5.1.2 – Add – Shared/Edit or Back option

3.5.1.3 – Snapshot for Reference

Patient: John Deo (123451)

ShareEditBack

5. Provider Tab - ** In this Application Participant should be Label as Provider

** Organizer/Admin – Should change the Role of Doctor and Nurses to manager the application.

Five user roles, all with the same login flow but different permissions:

Role	What they can do
Organizer	Anything. Creates meetings, adds users, manages everything.
Admin	Same as Organizer (system administrator).
Doctor	Be invited to meetings, add/discuss patients, add treatment plans.
Nurse	Be invited to meetings, view patients, participate.
Staff	View-only participation (future role, low priority).

e. Theme

Here's a full app where **all 12 palettes work as live themes** — click the theme button in the top-right to switch. Here's everything that changes instantly:

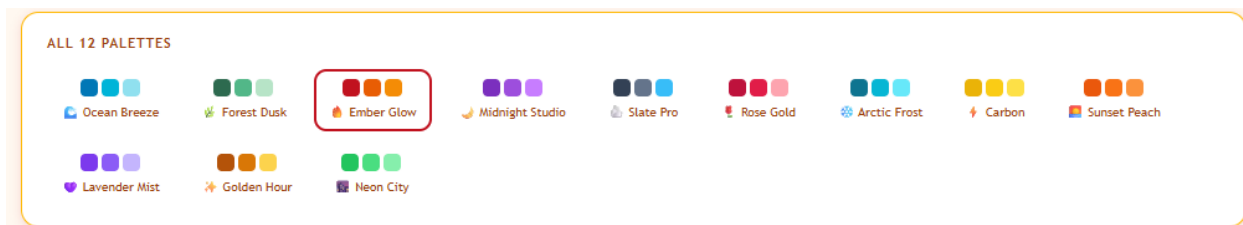

What updates with each theme:

- viii. 🎨 **Background & surface colors** — the entire page, cards, and sidebars
- ix. 📄 **Font family** — each palette has its own unique font (Georgia, Palatino, Courier, Gill Sans, etc.)
- x. ⚙️ **Navigation bar** — color, text, and active button style
- xi. 📦 **Cards, stats, tags, progress bars** — all pick up the palette's primary/secondary/accent
- xii. ⬤ **Buttons** — solid and outline variants both adapt
- xiii. 👤 **Avatars** — gradient matches the palette
- xiv. 🏠 **Color strip at the bottom** shows the active palette tokens liv

The 12 themes:

Name	Vibe
 Ocean Breeze	Cool blues, serif
 Forest Dusk	Earthy greens, elegant
 Ember Glow	Warm reds/oranges
 Midnight Studio	Dark purple, monospace
 Slate Pro	Clean neutral, professional
 Rose Gold	Rich pinks, refined
 Arctic Frost	Cy whites & cyan, clean sans-serif
 Carbon	Pure black bg, neon yellow accent, monospace
 Sunset Peach	Warm orange-pink, elegant Optima font
 Lavender Mist	Soft purples & lilac, Garamond serif
 Golden Hour	Rich amber & gold, classic Baskerville
 Neon City	Dark bg, electric green, techy monospace

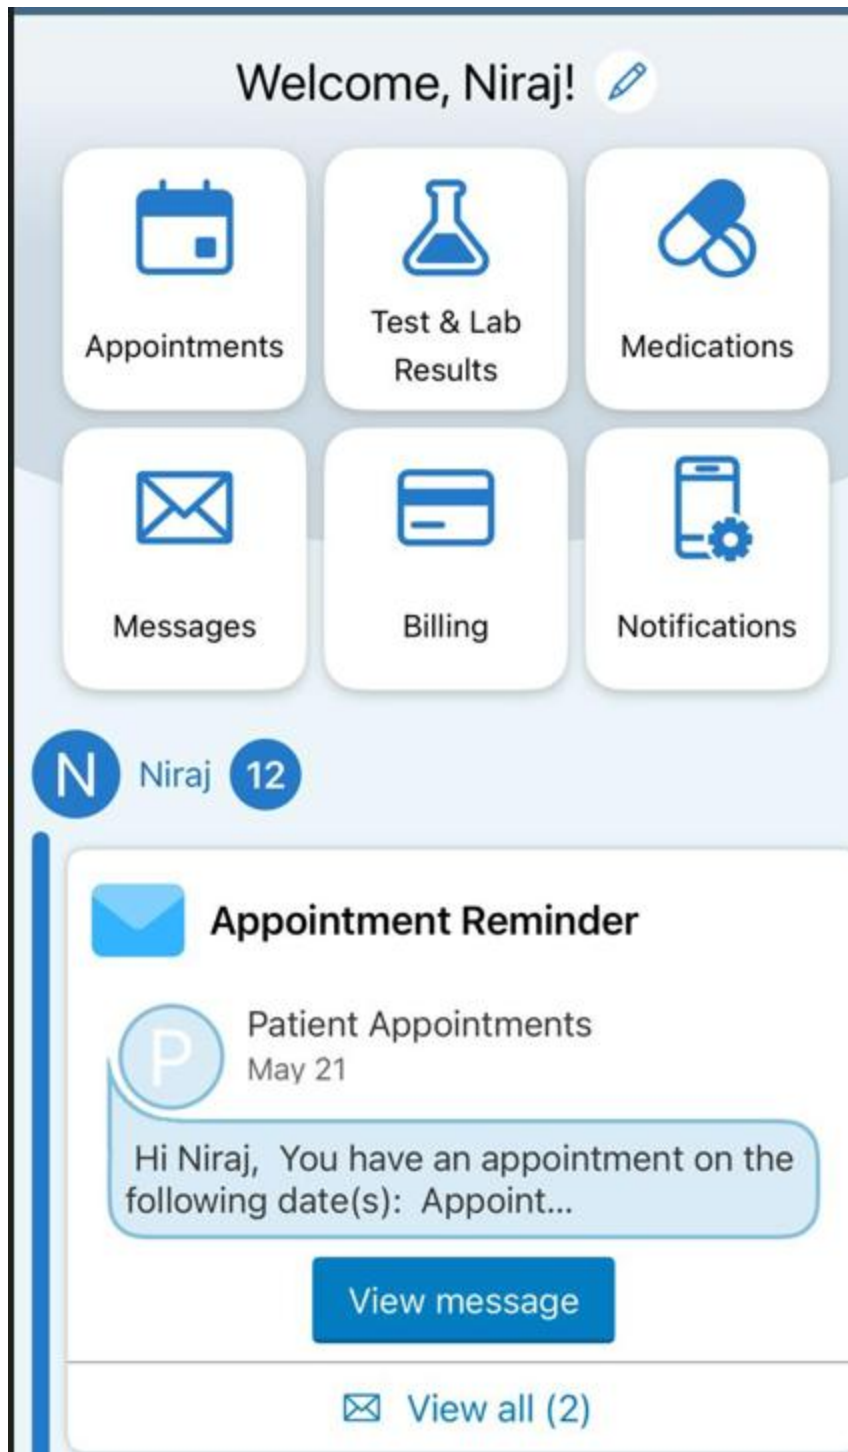

This option should also show in the bottom if the Page

10. Now how the Mobile Application Dashboard Page looks like.

*** Those screenshot for reference or samples.

*** Create similar and better versions of mobile applications.

There is Tab should be. Choice your own the Icon of each Tab.

1. Appointment
2. Medication

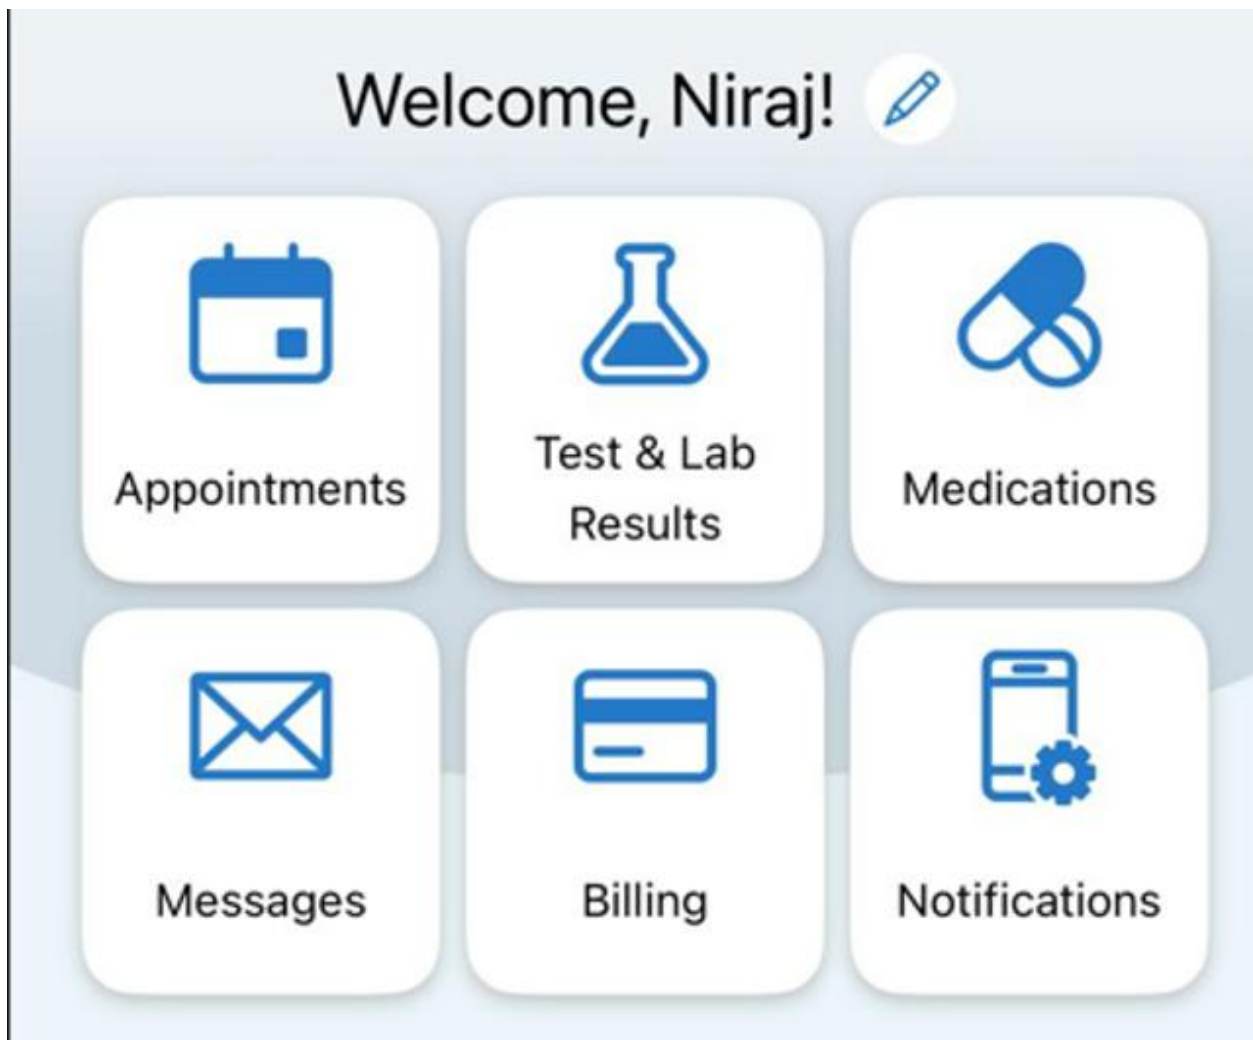

3. Side effect Reported – That mapped with Reported Effects from the main Application.
4. Message
5. Notification
6. Setting

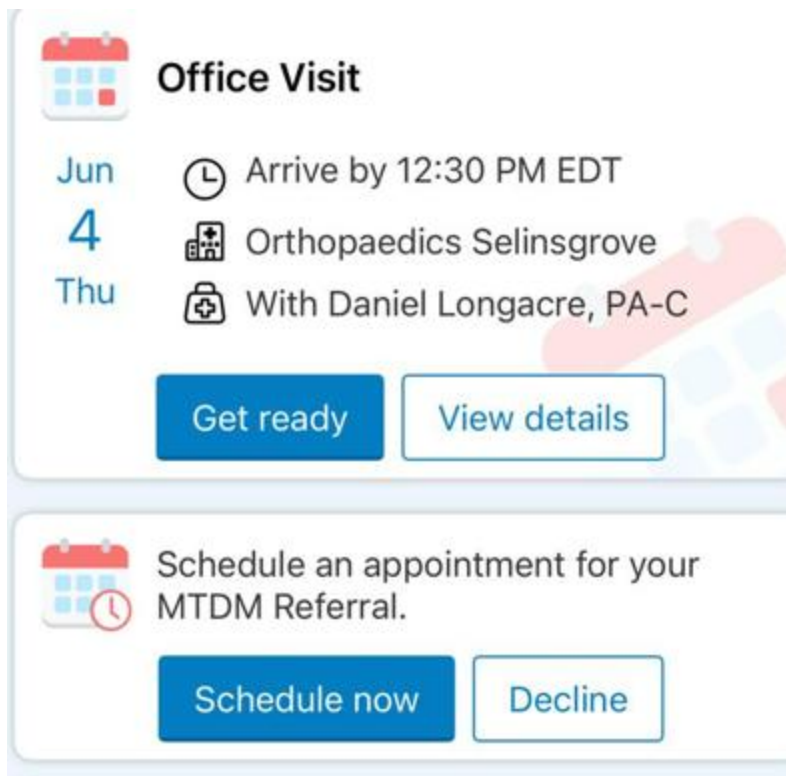

*** When I scroll Up – All the Tab show be in one Row. Like Below
